

# Introducing

## magic<sup>3</sup>® INTERMITTENT CATHETER *with Sure-Grip™*

The only intermittent catheter to offer touch-free insertion and maximum control, without sacrificing comfort.

*Now available in straight and Coudé tip*

*Patent-pending technology exclusively from...*

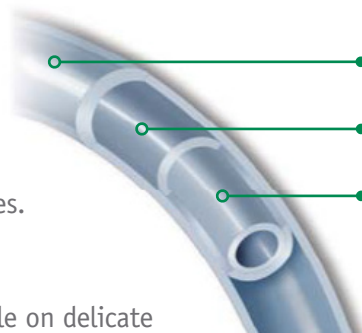

# Maximize CONTROL, minimize CONTAMINATION with the touch-free Sure-Grip™

Designed using a unique composite of three distinct all-silicone layers, combined with a gripping device, the Magic<sup>3</sup> Intermittent Catheter with Sure-Grip™ is more than just comfortable – it's easy to handle and eliminates the need to touch the catheter surface.

## The Catheter

### m<sup>3</sup> Technology

Magic<sup>3</sup> with m<sup>3</sup> technology is the first intermittent catheter made of three all-silicone layers – and the first that demands no compromises.

- Ultra-soft outer layer to maximize comfort
- Firm middle layer for easy handling
- Pliable innermost layer for easy navigation

### Environmentally Conscious Design

Its 100% silicone design is not only soft and gentle on delicate urethral tissue; but is latex and phthalate-free, eliminating the risk of latex-related allergic reactions and disposal concerns.

## The Sure-Grip™

### Control at the tip of the catheter

Firmly grasps the slippery surface and slides smoothly along the catheter shaft making it easier to maneuver giving the user more control while catheterizing.

### No-Touch Insertion Technique

Allows the catheter to be held firmly without touching the surface, minimizing the risk of contamination.
